- React JS / Next JS
- Material UI
- React Query
- Wagmi (Ethereum)
- Firebase
- HTML5 / CSS3 / SASS

## Work experience

### 2022 - Present

Axon Development Group | Kyiv, Ukraine (Remote)

#### Frontend Developer

- Development and implementation of dynamic single-page front-end applications utilizing cutting-edge technologies such as React, Typescript, React-hook-form, React Query, and Material UI.
- Customizing the user interface and framework components to align seamlessly with project requirements and design specifications.
- Collaborating closely with cross-functional Agile teams to contribute to the design, planning, and execution of new features and enhancements.

**Last project domain:** POS application for the event management system (fabnite.com)

I created a Point of Sale (POS) application tailored for the event management application. This app equips event organizers with a user-friendly interface to efficiently manage warehouses, oversee inventory, create customized menus, process orders, and handle secure payments.

My role in this project enabled seamless and organized event execution, enhancing the overall experience for both organizers and attendees.

### 2021 - 2022

EPAM Systems | Tbilisi, Georgia (On-site)

#### Frontend Developer

- Assisting in the development of front-end applications using React, Typescript, and other relevant technologies.
- Collaborating with the team to implement and customize user interface components.
- Participating actively in Agile team activities and learning from senior developers.

**Last project domain:** Event management system (axs.com)

I contributed to the development of an event management application that allows users to find music and sports events in the United States, buy and sell tickets, and get information about various artists.

My specific role was to create reusable user interface (UI) components and implement new features according to the project requirements.

### 2013 - 2021

Nexia TA | Tbilisi, Georgia

#### Tax Manager

- Providing expert guidance on tax planning and strategies to minimize the company's tax liabilities while remaining compliant with relevant tax laws and regulations.
- Supervising and mentoring tax staff, providing guidance on tax-related matters, and fostering their professional development.
